# Upload an Item to PHP Scripts

Upload

Hi! Before you upload to CodeCanyon for the first time.

Here's a checklist to get you ready to upload:

1. Read the standards and requirements for the item(s) you want to sell on [CodeCanyon](#).

2. Make sure your files, supporting information and assets are all organised and [ready for upload](#).

3. Follow our [upload instructions](#) to make sure it all goes smoothly.

Name

Maximum 100 characters. No HTML allowed. Follow our [Item Title Naming Conventions](#).

HTML Description

HTML or plain text allowed

This field is used for search, so please be descriptive! If you're linking to external images, please mind the page load speed: use few, compress them and host them on a fast server or CDN.

Files

Trouble uploading? Try our FTP service

Thumbnail

Supporting your item

Your current global support setting is set to **supported**.

Item will be supported?

Yes

Buyer will see this item as supported. [What is item support?](#)

Set Your Price (US\$)

It's important that you set the price for your items independently and not discuss your pricing decisions with other authors. The item price will **include** your author fee and your initial term of item support (if you offer it). See our [Author Terms](#) and [Item Support](#) breakdown if you want to know more.

Help

Get your item accepted

To give your item the best chance possible to be accepted, please make sure you've:

• Read and follow the [upload instructions](#).

• Added useful tags and ensured they're spelled correctly (this helps buyers find your file).

• Added a thorough and useful item description (this also helps buyers find your file).

If you've done all that, you're ready to upload. Thanks for selling with Envato!

Trouble Uploading?

Some users have experienced problems uploading. We've compiled a [list of things to check first](#) which might be of help. We're always working on improving our uploading infrastructure - but if you continue to experience problems please contact support.

Corrupt Zip Files

The following archive utilities have been found to generate non-standard zip files that our server is often unable to decompress:

• 7zip

• lzarc

• WinZip (Latest version)

Please use another archive utility to reduce the chance of problems with your uploads.
